

Appl No.:10/643,063

Atty. Dkt.: UCF-372

## REMARKS

Applicant thanks the Examiner for the telephone interview on August 12, 2008. During the telephone interview between Phyllis K. Wood, Reg. No. 28,663 and Examiner Nguyen figures 10-13 were discussed. In conclusion, the Examiner stated that "prosecution" was reopened to allow the Applicant to respond to the allegation that figures 10-13 failed to show the discontinuous electrode.

The Applicants are experts in their fields. Co-inventor Dr. Shin-Tson Wu is a Provost-Distinguished Professor of Optics in the Liquid Crystal Displays Lab at the University of Central Florida (UCF) in Orlando, Florida. Prior to joining UCF in 2001, Dr. Wu worked at Hughes Research Laboratories in Malibu, California for 18 years. He received his Ph.D. in Quantum Electronics, University of Southern California and BS in Physics from National Taiwan University. Dr. Wu is co-inventor on 46 patents. U.S. Patent Nos. 7,405,796; 7,369,204; 7,339,641; 7,298,445; 7,286,198; 7,268,848 and 7,015,997 use the terminology "continuous" and/or "discontinuous" to describe the electrode structures in liquid crystal displays.

MPEP section 706.04 states that full faith and credit should be given to the action of a previous examiner unless there is clear error in the previous action or knowledge of other prior art. The examiner should not take an entirely new approach or attempt to reorient the point of view of a previous examiner in mere hopes of finding something. *Amgen Inc. v. Hoechst Marion Roussel, Inc.* 126 F. Supp. 2d 69, 139, 57 USPQ 2d 1449(D-Mass 2001).

Applicants, Dr. Shin-Tson Wu and/or Dr. Wing-Kit Choi, as co-inventors are entitled to "full faith and credit" the Examiner's gave to the patents issued using the same terminology used in the specification and claims of the subject patent application. For the reason provided, Applicant believes that the drawings show every feature of the invention specified in the allowed claims. Thus, Applicant respectfully requests that Figures 10-13 be entered and the application be allowed to issue.

If the Examiner believes that an interview would be helpful, the Examiner is requested to contact the attorney at the below listed number.

Respectfully Submitted;

  
Brian S. Steinberger
